

DIP(T)

1.) Laabaa

2.) dev

Smoothning(Blur)

sharpening

Negative of smoothning is sharpening

sharpen = original + blurred mask

Blurred image= original image -

Gradient-sharpening

2nd gradient

laplacian filter

1 st derivative=> $g(x,y) = f(x+1,y) - f(x,y)$

2nd derivative => $g(x,y) = f(x+1,y) + f(x-1,y) - 2 * f(x,y)$

ramp and step

-1	-1	-1
-1	2	-1
-1	-1	-1

	+1	
+1	-4	+1
	+1	

$+1$	$+1$	$+1$
